Google Home Integration with People Wi-Fi (PL6741)

Do you have Google Home and a People Wi-Fi? You won’t need anything else to control your system with your voice. You can integrate your Google Home into the Comelit video intercom system in just a few simple steps, without the help of a professional.

What do you need?
1. Own a configured and working Google Home device
2. Own the People Wi-Fi video intercom **(art.PL6741)**
3. Have the Comelit app installed on your smartphone, updated to the latest available version
4. Have the Google Home app installed on your smartphone

What functions can you manage?
– Open doors, gates or entrances with voice only*
– If you have assigned actuators (for example “stair lights”) to the monitor buttons, you can activate them with your voice only

How can you use this functionality? Follow these simple steps:
1. Download/Update the Comelit app to the latest available version and pair your People Wi-Fi
2. Download the Google Home app and activate the Comelit Home action

Procedure:
1. Open the Comelit app and log in
2. Select the icon in the top left and choose the Manage devices menu
3. Follow the procedure described below
