Comelit 1.2.x application
available on App Store and Google Play

Comelit®
Passion. Technology. Design.

Table of contents

The **Comelit** App is supported by devices with iOS 10 (or later) and by the most common Android devices with Android version 4.3 or higher, however some functionalities may be limited depending on the model and the version.

Introduction

The Comelit application installed on smartphones or tablets allows you:

- *to receive audio and video calls from external unit*

- *to make intercom calls with other internal devices*

- *view (or record) videos from external units and remote camera*

- *to record video messages on missed calls*

- *to activate actuators*

- *to manage/configure multiple systems*

    ⓘ   ***With monitor Art. 6741W in building mode, some functions are only available when the monitor display is on; see*** ***"Functions available with monitor 6741W"***
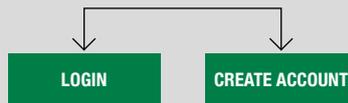

Smart Registration

1. Install the **Comelit** application, connect to your Wi-Fi network and open the application.

1.

2. Login if you already have a Comelit account or create a **new account.**
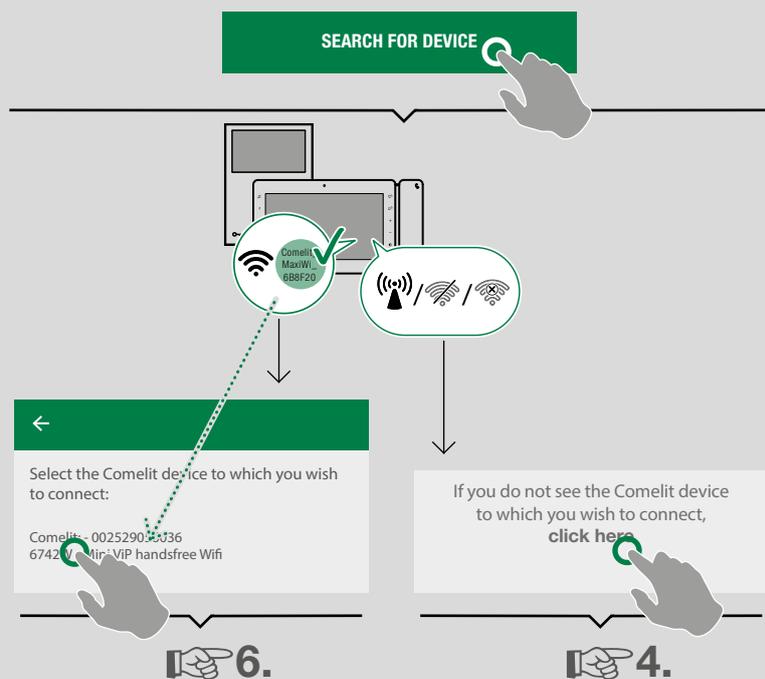

2.

LOGIN   CREATE ACCOUNT

3. Select **"Search for device"**.

- if the Comelit device is already connected to the WiFi network (🛜) and is detected by the application: in the App, select the name of your device and go to step **6**;

- otherwise (▨ / ▨ / 🛜) continue to step **4**.

3.

SEARCH FOR DEVICE

Comelit_MaxiWi_6B8F20

←

Select the Comelit device to which you wish to connect:

Comelit - 0025290xxx36
67420 - Mini ViP handsfree Wifi

If you do not see the Comelit device to which you wish to connect, **click here**

☞ **6.**   ☞ **4.**

4. **If the device is not already connected to the Wi-Fi network, or if the network cannot be detected, the Comelit APP launches the Wi-Fi connection setup procedure.** Confirm the presence of a door entry monitor with a Wi-Fi connection and switch on the Comelit device.

4.

Do you have a Wi-Fi door entry monitor?

NO   YES
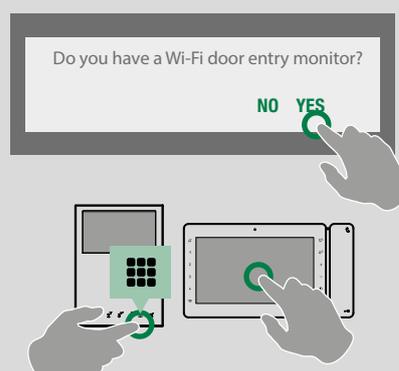

5. Check the status of the Wi-Fi connection on the door entry monitor; from the App, press the symbol displayed on the Comelit device and follow the instructions identified with the same icon (🛜 / 📶 / 📶 / 📡)

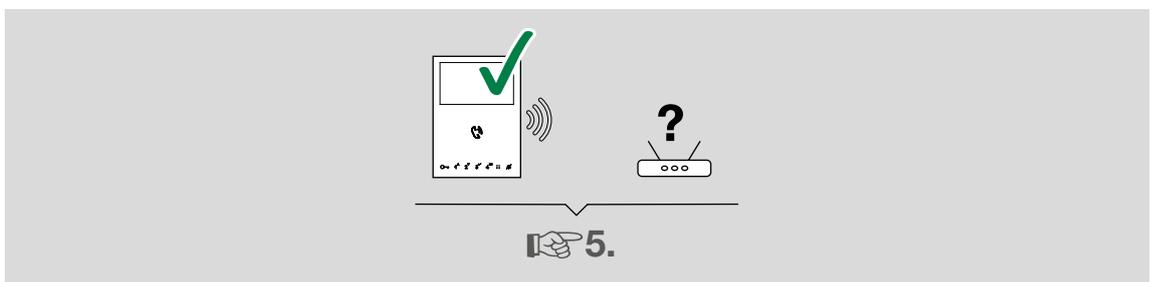

Wi-Fi connected (🛜 🛜 🛜 🛜) : go to step **3**.

👉**3.**

Door entry monitor Wi-Fi switched off: access the setup menu by selecting the Wi-Fi and "Enable Wi-Fi" connection.

WiFi Setup

☑ **Enable WiFi** ✓
WiFi Setup
☐ Wifi reporting not connected

⟶ 👉**5.**
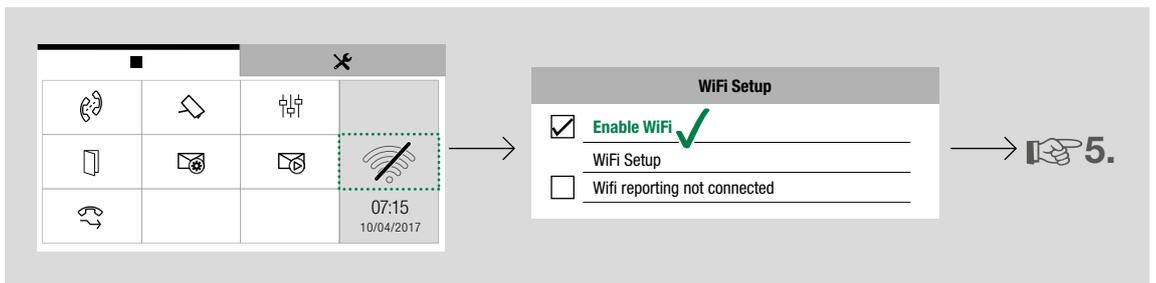

No connection:
the monitor's Wi-Fi reception is active; check the router status and try again.

👉**5.**

iOS
From the Wi-Fi settings of the iOS device, connect to the Wi-Fi network of the Comelit device and reopen the Comelit App.

android
Select the Wi-Fi network of the Comelit device and proceed.
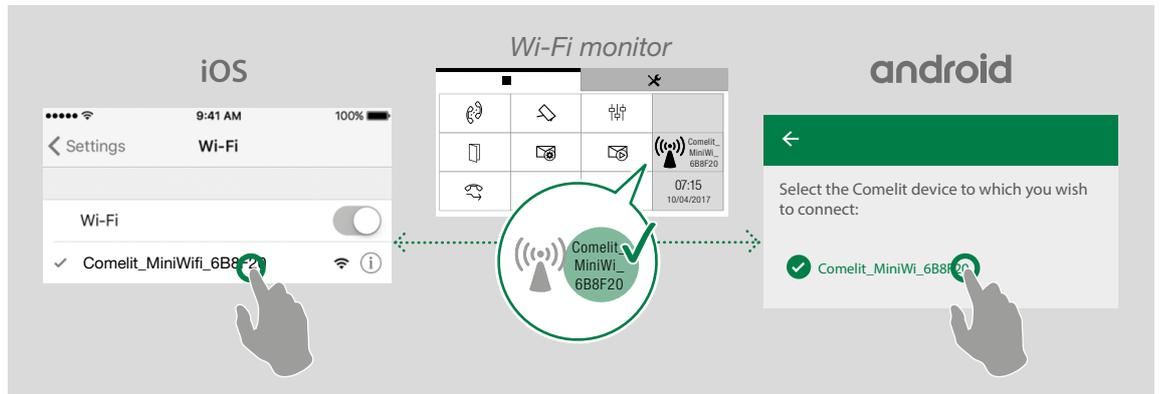

Check that the network name displayed corresponds to that of the Comelit device and proceed.
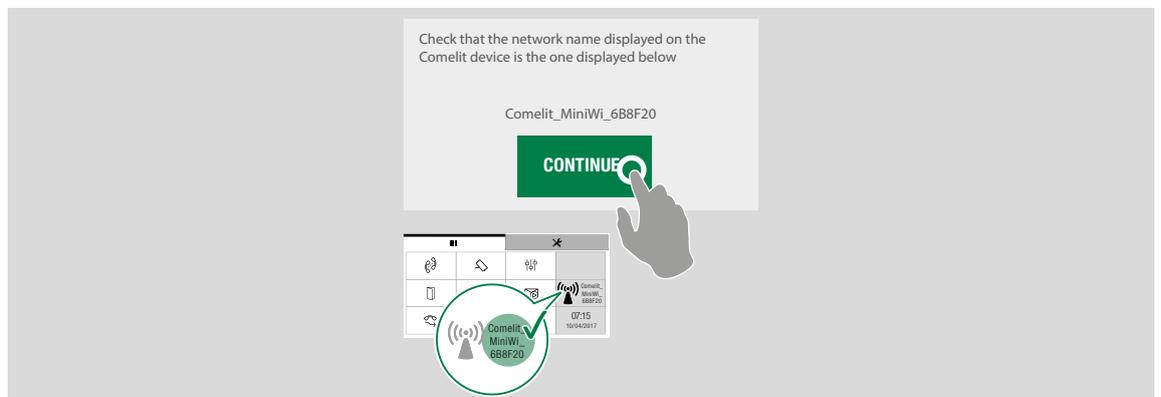

Select your Wi-Fi network and enter the password (for hidden networks, enter also the "protection level" and the SSID name of the network). Before confirming, check that the Comelit device is still powered on.

6. Choose whether you wish to be added as a **new user** or if you want to be registered as the **only user** (thereby deleting all previously registered users) and follow the instructions on the screen to complete registration.
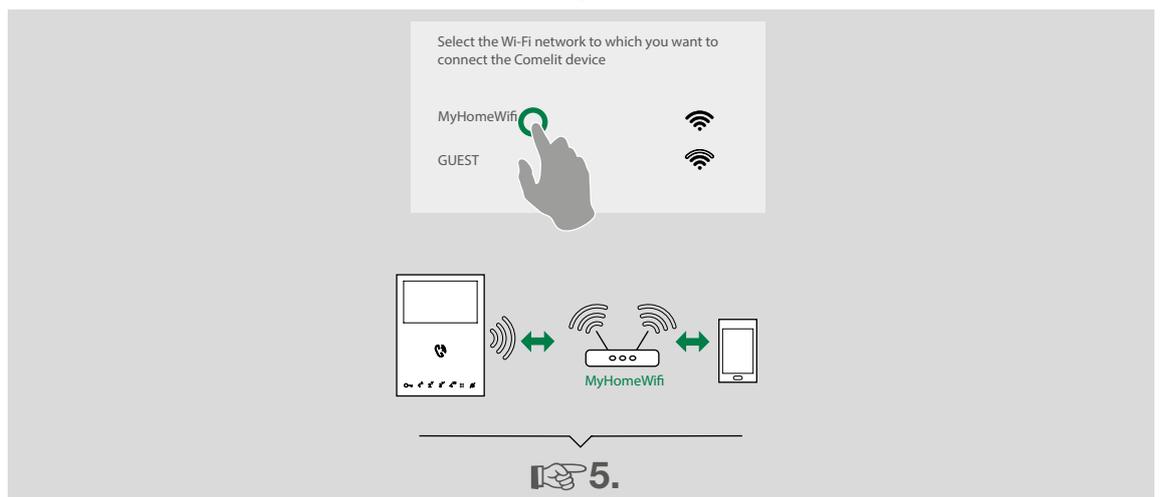

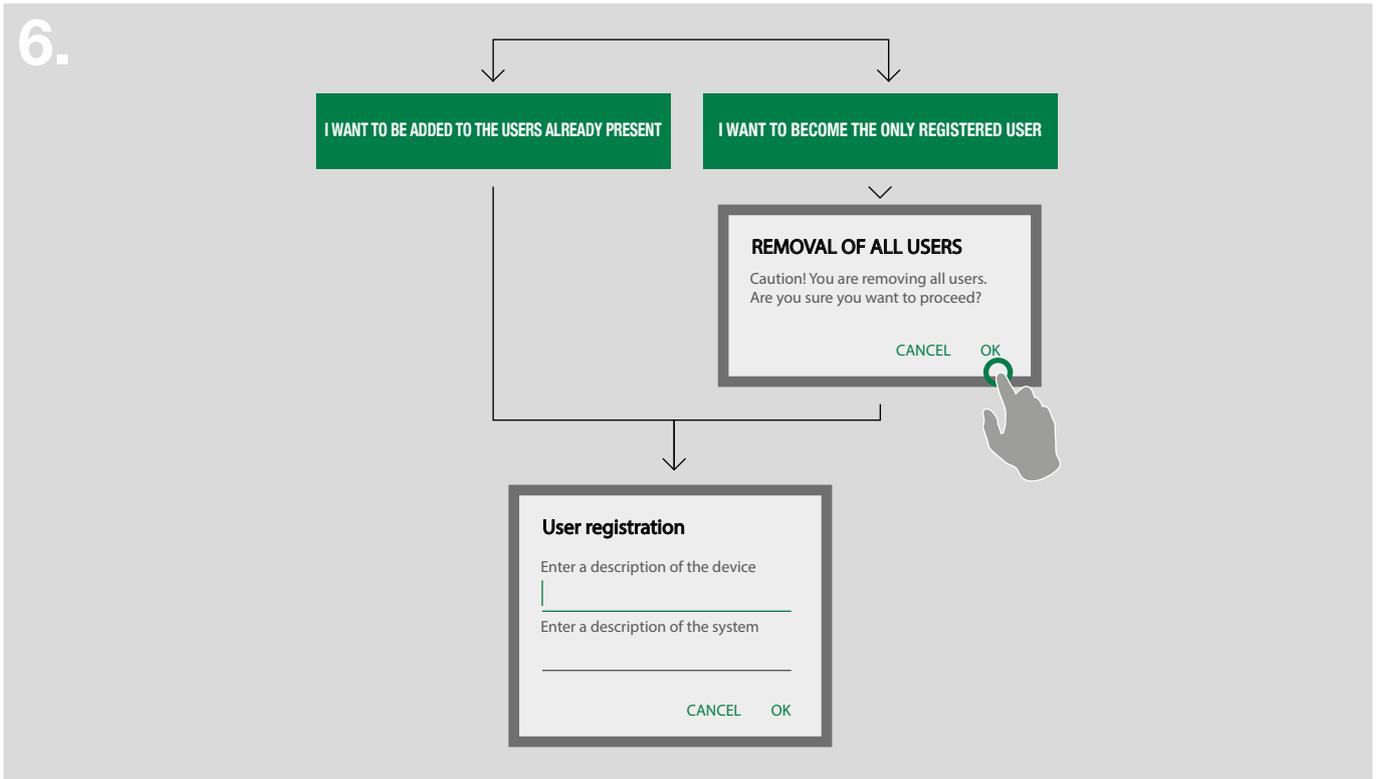

6.

🔒	USER ADMINISTRATION	*Press to access the users configuration*
✖	SETTINGS	*Press to set ringtones, video recordings, widgets and advanced settings*
🗝	LOGOUT	*Press to disconnect the user*

* Visible only if the directories customization is allowed or if there is at least one entry in the directory.

ℹ **With monitor Art. 6741W in building mode, some functions are only available when the monitor display is on; see "Functions available with monitor 6741W"**

Systems management

▶ From the pull-down menu choose **"Manage systems"**

- **If you want to enable/disable notifications:** *use the specific selector* **[A]**

- **If you want to change the name, change the Wi-Fi settings* or delete the configuration of a system:** press and hold one of the sections of the directory to activate the delete and edit keys *[B]*
  * required when changing the password or the name of your Wi-Fi network

- **If you want to add a new system:** *press* + **[C]**
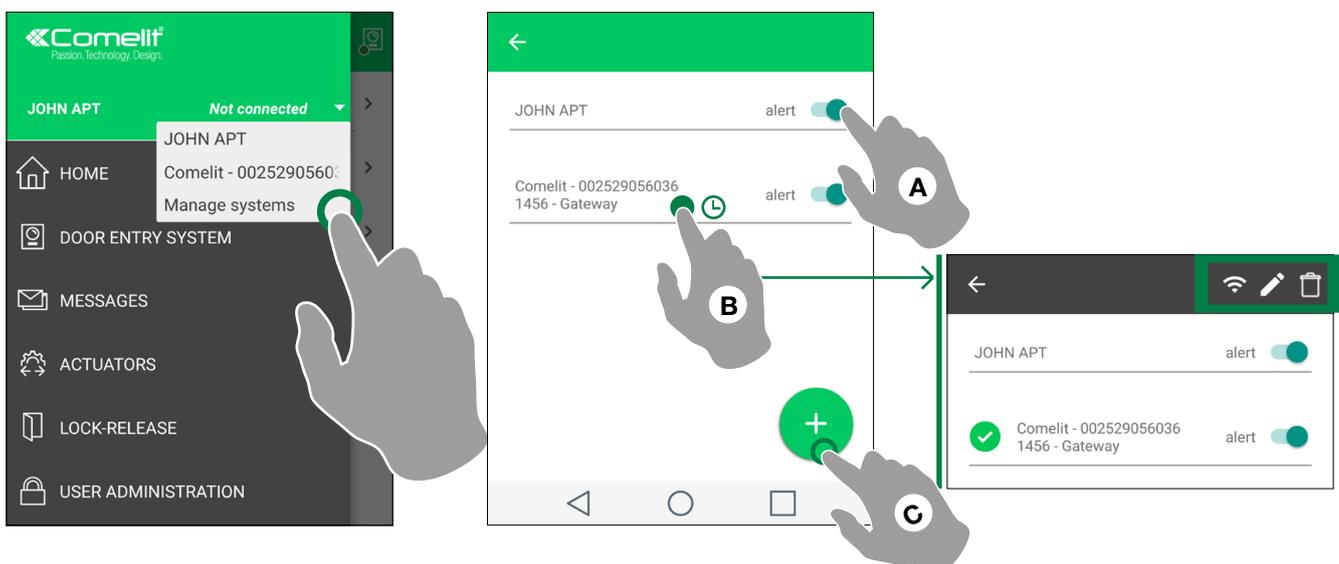

HOME [🏠]

The home page provides quick access to the most common commands and to view the notifications in memory.

*You can customize the home page from the settings (see* **"Widget"***).*
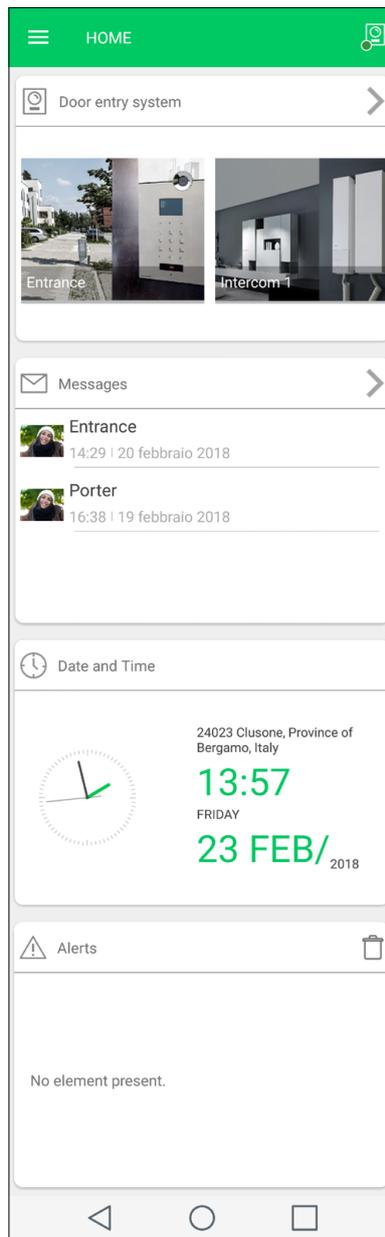

DOOR ENTRY SYSTEM [ ]

In the door entry system section, the following functions are available: self-ignition of an external unit, intercom call, call to a switchboard, camera switch on.

## Perform an action on an element in the directory

▶ Touch an element in the directory to control the desired action (see table)

➕ **#** Optional. Visible only if the directories customization is allowed (see **"Add an entry to the Directory"**)

	FUNCTIONS AVAILABLE FOR EACH DIRECTORY			
Functions	*External unit self-ignition*	*Intercom call*	*Secondary switchboard*	*Camera activation*
reply ▶ press to enter in communication with the calling subject / **call closure** ▶ press to end the call	✓	✓	✓	
lock-release ▶ press to activate the door lock of the interlocutor external unit	✓			
microphone deactivation / **microphone activate**	✓	✓	✓	
start video recording / **stop video recording**	✓			✓
virtual button 1/2 ▶ press to command the programmed action (see **"Virtual buttons programming"**)	✓	✓	✓	✓

## Scroll through the directories (Android only)
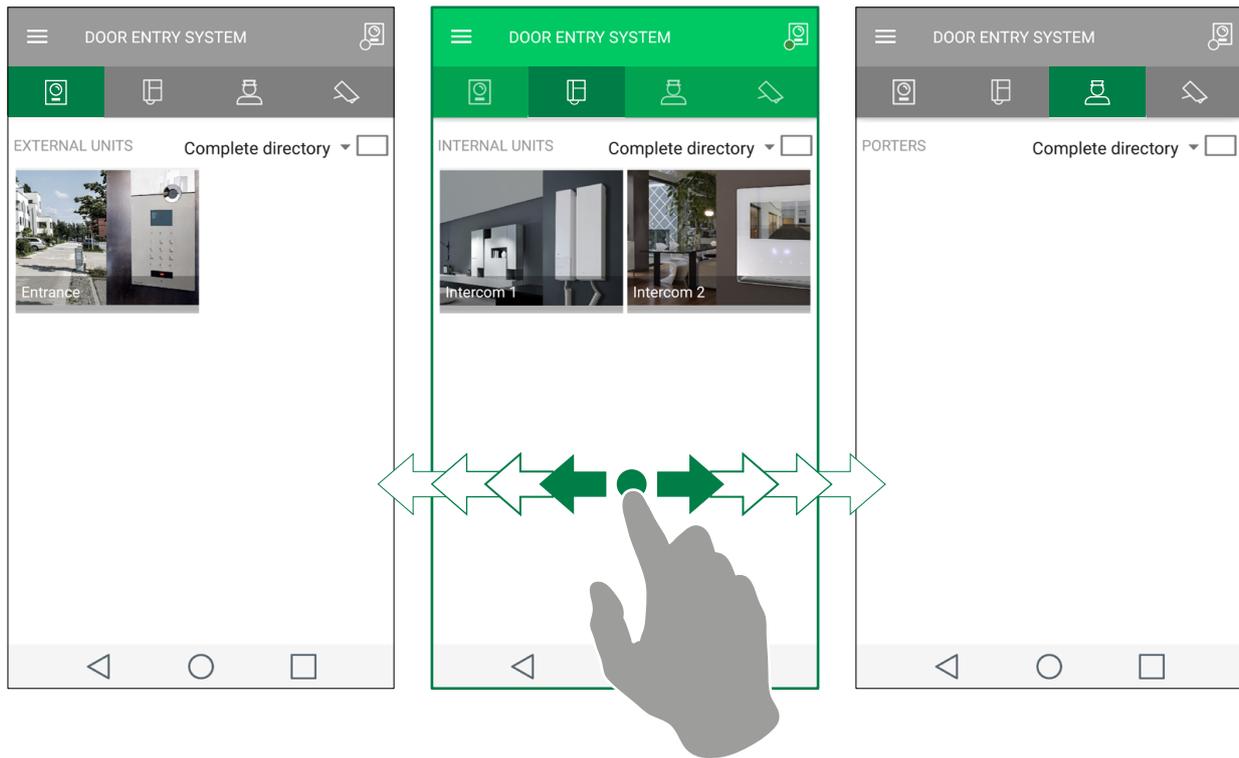

Switch to full screen view
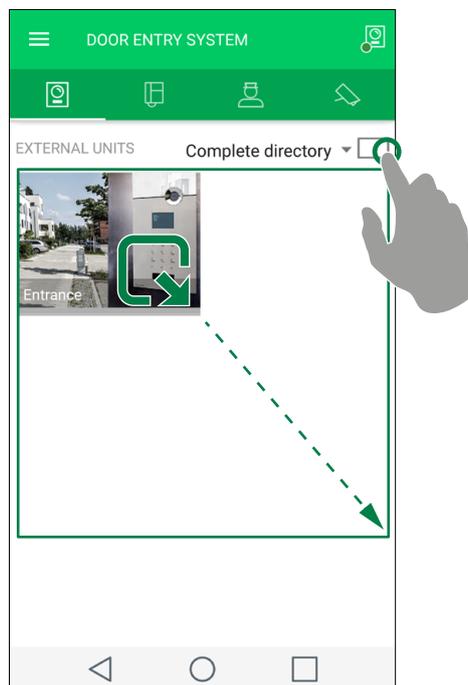

Directory image customization

1. Press and hold the desired item to activate the edit buttons.

2. Press ✏️ to access the editing page.

3. Press the "image" icon, search for the desired photo in the memory of your device, and save.

MESSAGES [✉️]

In the Messages section, you can view and delete the recordings made (from external unit and remote camera) and the messages in the video memory function.

1. Enter the Messages/Video memory function page

2. Press the video you want to display to start the playback.

▶ Press 🗑️ to delete an element in the video memory.
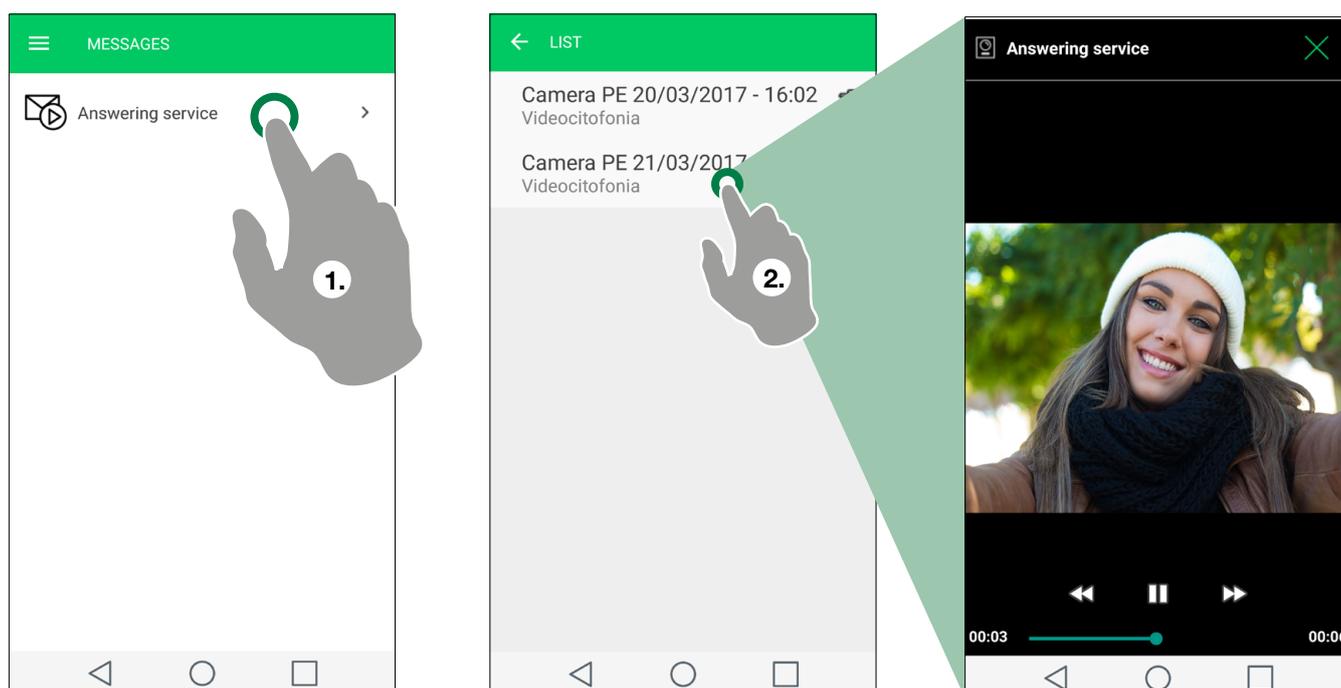

ACTUATORS / LOCK-RELEASE [⚙ / 🚪]

This section provides a list of actuators/lock-release controls

▶ Touch the element to activate it

For more viewing and customization modes, see:

"Switch to full screen view",

"Directory image customization"

SETTINGS [⚒]

Ringtone setting

From the Settings/Ringtone Settings page, you can customize the ringtone for: Outgoing Call, Intercom Call, Alarm, Group Call, Notifications.

Video recording settings

From the Settings/Video recording settings page, you can enable/disable the missed call recording and set the length of the recording (to choose between: 5/10/20 seconds).

Widget

From the Settings/Widget page you can choose what to make visible on the home page and set the order of the elements.

1. Tick the elements that you want to make visible in home. For Door entry system, Actuators and Camera enter the submenu to select the individual devices/actuators.

2. Drag the elements in the desired order.
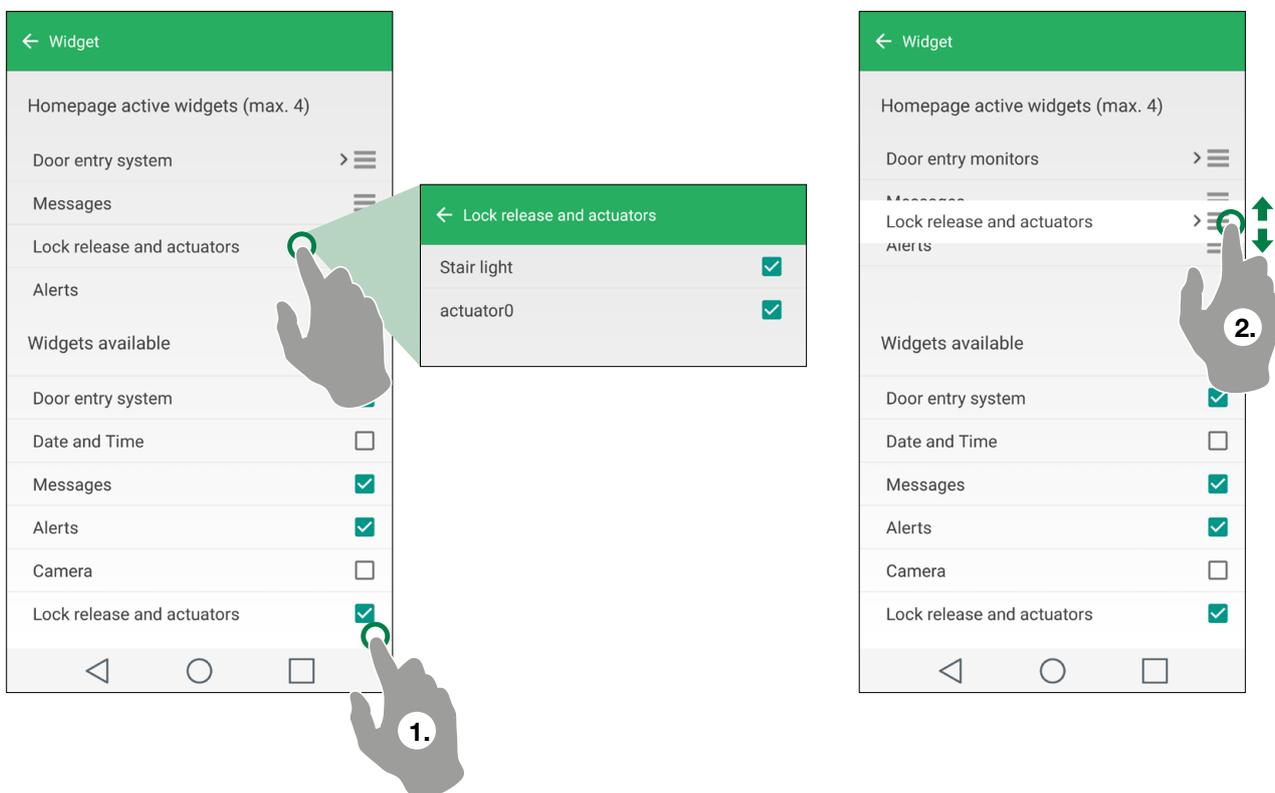

Advanced configurations

Add an entry to the Directory

▶ Press ➕ and complete the required fields (see table) to add an entry to the directory.
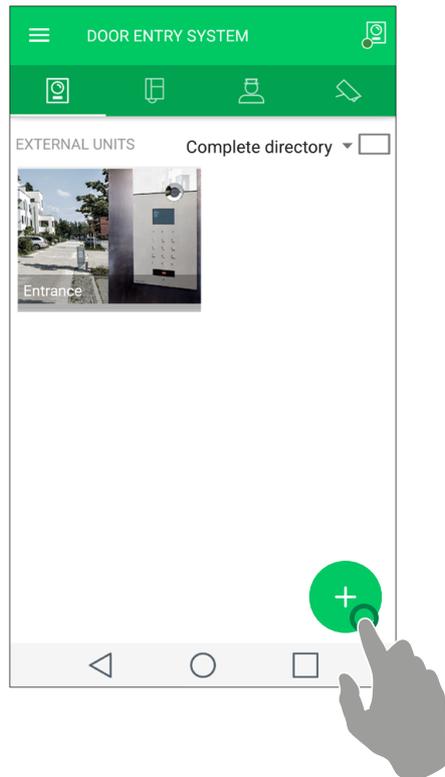

📷	**Name:** enter the description. **ViP address:** enter the ViP address. **Image:** see **"Directory image customization"**
🏠	**Name:** enter the description. **ViP address:** enter the ViP address **Slave:** from the pull-down menu, choose whether to configure a call to the entire apartment or only to the master monitor or to a slave monitor, as required. **Image**: see **"Directory image customization"**
👤	**Name:** enter the description. **ViP address:** enter the ViP address **Image:** see **"Directory image customization"**
📹	**Name:** enter the description. **ViP address:** enter the ViP address **Slave:** select the desired camera from the pull-down menu. **Image:** see **"Directory image customization"**
⚙	**Name:** enter the description. **ViP address:** enter the ViP address **Relay:** Enter the number of the actuator module (choose between "onboard" or from 1 to 10). **Expansion:** Enter the number of the relay (1 or 2) or the expansion number (from 1 to 10) that you wish to control. **Image:** see **"Directory image customization"**
🚪	**Name:** enter the description. **ViP address:** enter the ViP address **Relay:** Enter the number of the output you want to control. **Image:** see **"Directory image customization"**

Delete an entry to the Directory

1. Press and hold the desired item to activate the delete button.

**2.** Press [trash icon] to delete the element.
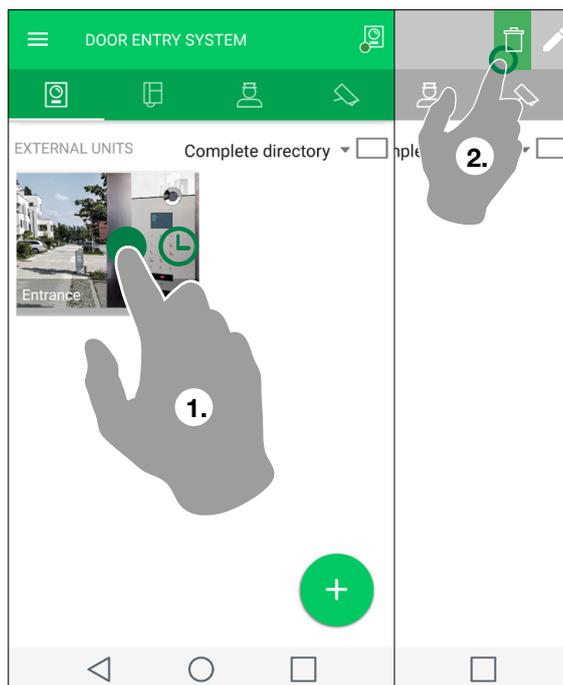

USER ADMINISTRATION [🔒]

From the User Administration page you can change the system password, enable/disable a user, add/delete/edit a registered user/device.
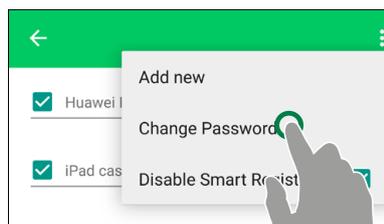

Access to the administration area

▶ From the "User Administration" main menu, complete the required fields (with the data provided by your installer) to access the administration area.
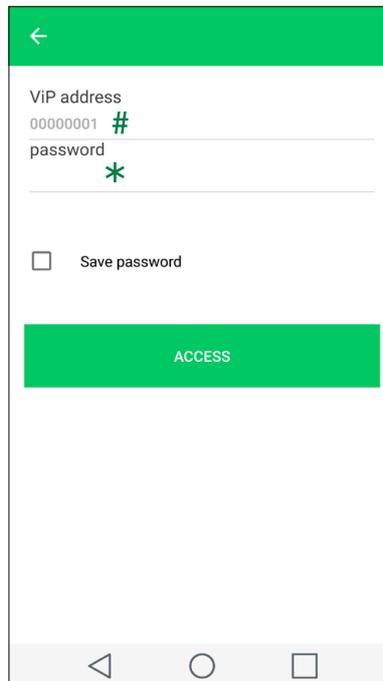

✴ the default password for all devices except 1456B is: **admin**

System password change

✓ After accessing the user administration area (see: **"Access to the administration area"**).

▶ Press the ⋮ followed by **"Password Change"** and follow the instructions that appear on the video to change the system password.

User activation/deactivation

✓ After accessing the user administration area (see: **"Access to the administration area"**).

▶ Activate/deactivate an already registered user to the system by selecting/deselecting it.
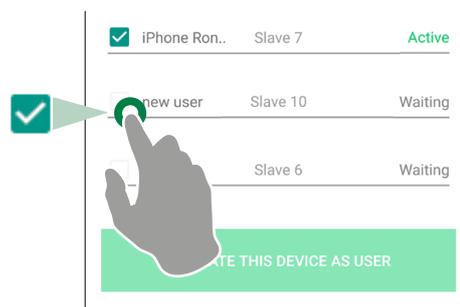

Adding new user

This function allows you to add a new user unconnected to your home network (useful if you want to allow access to your system to friends/relatives)
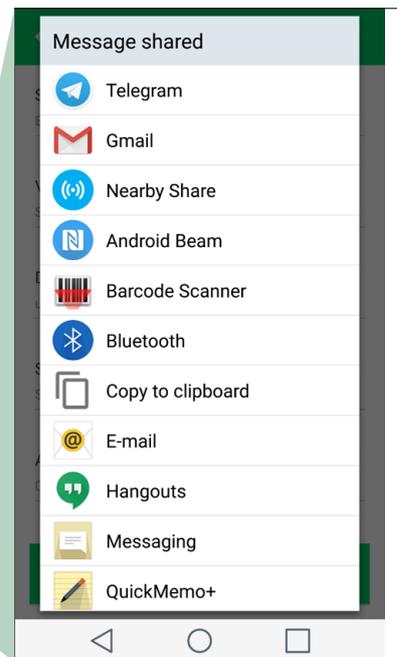

√ After accessing the user administration area (see: **"Access to the administration area"**)

1. Press ⋮ followed by **"Add new"** to add a new user.

2. Complete the description field, choose an available slave and confirm.

3. From the user list, press the newly entered user to access the registration data.

4. Send the recording data (**.mug** file) pressing the **"send registration data"** button.

 » *the new user must install the Comelit application and open the .mug file received, to complete the registration procedure.*
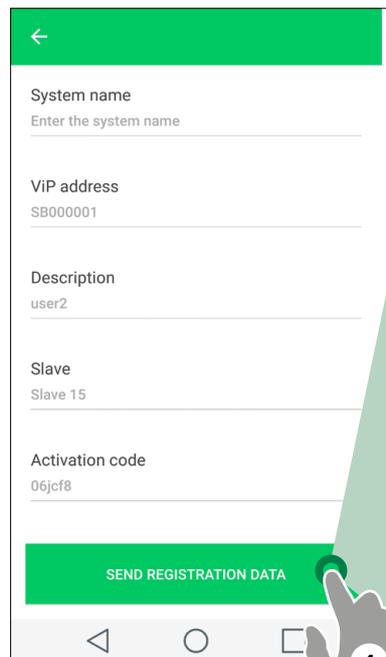

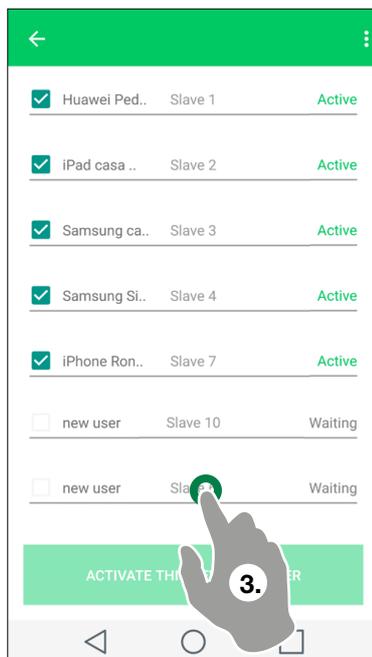

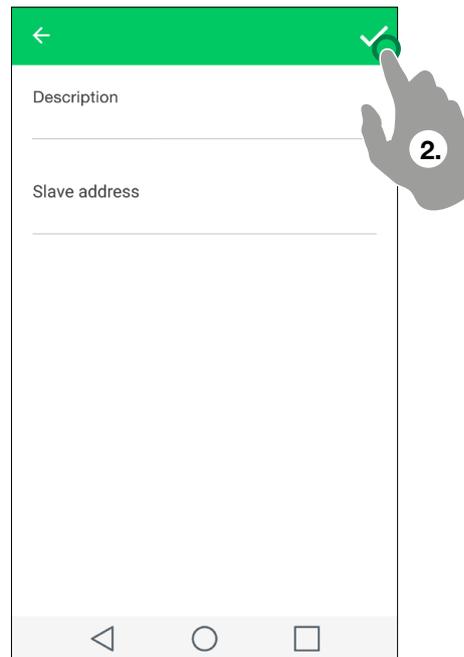

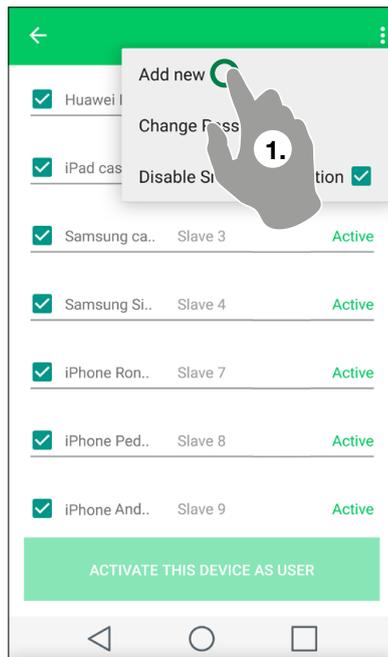

Enable/Disable Smart registration

This function allows a new user to register their system from their smartphone via Smart registration, or prevents them from doing so.

√ After accessing the user administration area (see: **"Access to the administration area"**).

▶ Press ⋮ and select the function to enable App registration

▶ Press ⋮ and deselect the function to disable App registration, **to prevent the registration of unknown items and keep your system secure**
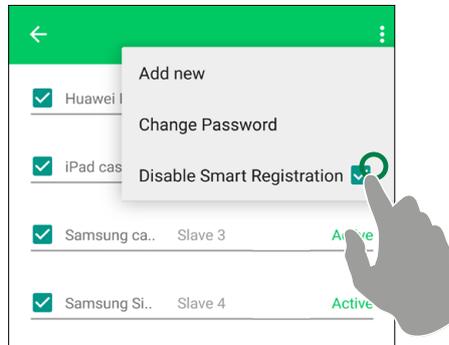

ADVANCED SETTINGS [✄]
